CSS

SASS

ReactJS

Django

Git

Node.js

Oracle EBS

VS Code

Figma

PROJECTS

Indy Food Blog - Full Stack Web App

- Developed a Full Stack Web App that exceeded client's standards by using Redwood JS along with neat stuff
- Produced a Markdown previewer that gives the user the ability to preview how the articles will look while they write them using React's useState along with the node package 'marked'
- Designed the Front End using Figma for wireframe, mock-ups, and prototyping to ensure a consistent design language
- Technologies used: React JS, Redwood JS, SASS, GraphQL, Javascript, react-tsparticles, marked, storybook, Figma

Spacetagram - Front End Social Media Web App

- Employed a mobile first web design approach to ensure smooth functionality on mobile and computer
- Made use of Material-UI's for customized styling and components
- Ensured that all HTML elements were semantically correct to provide optimal user experience and accessibility

GetItDone.js - Full Stack Productivity App

- Developed a full-stack web application with a small team in under 3 weeks
- Utilized Node.js with Express to create a CRUD Api hosted on glitch.me
- Implemented react-beautiful-dnd to add drag and drop functionality to the project
